ABSTRACTED-PUB-NO: WO 200127917A

BASIC-ABSTRACT:

NOVELTY - Virtual recording cells (40) are virtually defined in a groove (16) in a recording layer (12) of an optical recording medium (10). The application power of a laser beam is varied in five or more steps according to information to be recorded for each virtual recording cell (40), and as a result, record marks (48A to 48G) having different sizes and/or light transmittances different in five or more steps. Therefore the overall light reflectance of the virtual recording cells (40) are varied in steps, and consequently the overall reflection level of the virtual recording cells (40) including the outside of the recording marks with respect to a read laser beam used in reproduction is varied in five or more steps.

USE - Optical recording medium with optical recording, optical recorded medium reproduction

DESCRIPTION OF DRAWING(S) - Virtual recording cells 40

Groove 16

Recording layer 12

Optical recording medium 10

Record marks 48A to 48G

ABSTRACTED-PUB-NO: WO 200127917A
